Experience

Full stack developer - Kyiv Independent

August, 2022 - June, 2023

My responsibilities included implementing features to enhance user experience, optimizing website performance for seamless navigation, and integrating multimedia content such as videos, images, interactive elements and payment system.

Lead Engineer - WebWay

January, 2021 - July, 2023

As a developer on the buy and sell project, I played a crucial role in crafting an online marketplace that facilitated seamless transactions between buyers and sellers. My responsibilities encompassed creating intuitive user interfaces, implementing secure payment gateways, and integrating reliable shipping and tracking systems.

UI Engineer - AMT - Recon Pro 360

June, 2021 - June, 2022

As a UI engineer on the car service project, my primary focus was on creating a visually appealing and user-friendly interface for the platform. I collaborated closely with the design team to translate their mockups and wireframes into interactive and responsive user interfaces.

Front End developer - Incard

November, 2021 - March, 2022

My responsibilities included implementing responsive and accessible web pages, ensuring the platform worked flawlessly across various devices and browsers. I integrated form validation and error handling to enhance data accuracy and user experience during the registration process.

Front End developer - Finixio

April, 2022 - August, 2022

As a front-end developer on the project making WordPress plugins, my primary focus was on creating visually engaging and user-friendly interfaces for the plugins. Working in tandem with the back-end developers, I collaborated closely with the design team to translate their concepts into interactive and responsive front-end components.

Front End developer - Avtologistika

June, 2023 - July, 2023

I was responsible for implementing the user interface that showcased the company's services and facilitated seamless navigation for visitors. Working closely with the design and back-end teams, I translated the project requirements into visually appealing and responsive front-end components.

Front End developer - YoHouse

May, 2023 - June, 2023

In summary, my role as a front-end developer on the house building engagement website project involved creating an aesthetically pleasing and interactive platform that effectively showcased the company's house building services and designs, enhancing user engagement and contributing to the company's online success in the competitive industry.

Front End developer - Muscle & Motion Web App

June, 2021 - December, 2021

Throughout the project, I implemented interactive features, such as video playback, exercise categorization, and personalized user profiles, to enhance user engagement and learning experiences. I also optimized the website's performance to ensure fast loading times and responsiveness across various devices and screen sizes.
